- Skype™ ready to make high quality video call easily
- Turn your Smartphone into a remote for Philips AV products
- USB 2.0 plays video/music from USB flash/hard disk drive
- Built-in Wifi 2x2 for faster, wider wireless performance

Highlights

4K Ultra HD Upscaling

See your favorite movies and photo as you have never seen them before. Turn your standard HD films and photos into incredibly sharp and clear 4K x 2K ones that are four times more detailed to make your 4K TV shine, with instant upscaling on the BDP7750.

Miracast™

Miracast™, a technology that enables consumers to unleash their Android phone's and tablet's content on the TV. Anything on your phone screen can be viewed on your television in an instant. Look at photos, watch videos, stream YouTube, even play mobile games on your TV's big screen wirelessly.*

7.1 channel surround sound

Enjoy the best sound experience with all your different types of contents. When you are

watching your movie, you can get a full 7.1 surround sound to immerse you in the action. When listening to music, where surround sound is not needed, the system will intuitively channel it to 2.1 stereo sound in which the music will be presented in the best form. Of course you can always choose from the various sound preset modes available on your Blu-ray and/or DVD player, ranging from pure stereo or 7-channel stereo to Dolby TrueHD and DTS Master Audio 7.1 surround sound for the best HD sound experience.

Smart TV

Philips home theater & Blu-ray player with Smart TV offer you an array of enhanced features, including Net TV, SimplyShare & MyRemote. Net TV brings a wide range of online information & entertainment to your TV for services like video-on-demand. With SimplyShare, you can access photos, music & movies stored on your PC from the comfort of your couch. You can also use your smartphone/tablet to control your home theater via Philips MyRemote app.

CinemaPerfect HD

Philips' CinemaPerfect HD engine offers a new standard in clear and sharp video playback.

This intelligent engine reduces noise and sharpens images to bring you higher quality video images than previously seen. Video noise reduction and super scaling work to reduce the noise that is produced when video is compressed into MPEG format. With improved color processing, the engine produces sharp, deep images on screen.

Dolby TrueHD and DTS-HD MA

DTS-HD Master Audio and Dolby TrueHD delivers 7.1 channels of the finest sound from your Blu-ray Discs. Audio reproduced is virtually indistinguishable from the studio master, so you hear what the creators intended for you to hear. DTS-HD Master Audio and Dolby TrueHD complete your high definition entertainment experience.
